(*) Bolsas y Mercados Argentinos S.A.

Main indicators for the nine-month period ended September 30, 2026:

• **Net Income** for the period totaled AR$ 146,980.2 million (AR$ 334.52 per share), compared with AR$ 214,135.7 million (AR$ 487.37 per share) in the same period of the prior year. The year-over-year decline was primarily attributable to lower impairment recoveries on financial assets and lower foreign exchange gains, partially offset by a lower income tax expense and reduced administrative expenses.

• **Revenues** for the nine-month period totaled AR$ 550,410.3 million, down 2.1% from AR$ 562,350.5 million in the same period of the prior year. The decline was primarily attributable to lower revenues from domestic gas transportation services, partially offset by higher export gas transportation revenues. The increase in export revenues reflected higher U.S. dollar-denominated billings and the positive impact of the appreciation of the U.S. dollar against the Argentine peso.

• **EBITDA** [1] for the period totaled AR$ 303,055.0 million, down 4.9% from AR$ 318,760.0 million in the same period of 2025. The decline was primarily driven by lower revenues and higher cost of revenues, partially offset by reduced administrative expenses.

[1] **EBITDA:** Earnings before interest, tax, depreciation and amortization, have been calculated as "Income before other income and expenses" plus depreciation for the period for items of "Property, plant and equipment". Include litigation expenses relating to settlement agreements.

1- Current economic context:

The Company operates within a complex economic context where the main variables have experienced strong volatility.

Argentina's main macroeconomic indicators are:

- The Gross Domestic Product increase in 2025 was 4.4%.
- Cumulative inflation between January 1 and September 30, 2026 reached 23.64% and year-to-year inflation as of September 2026 reached 33.35%, according to the Consumer Price Index ("CPI") published by the National Institute of Statistics and Census ("INDEC").
- Between January 1 and September 30, 2026, the price of the US dollar increased by 4.26% against the Argentine peso, according to the exchange rate published by Banco de la Nación Argentina ("BNA").

As of the date of issue of these condensed interim financial statements the economic context continues to be uncertain and volatile. The Company's Management permanently monitors how the variables that affect the business evolve in order to determine possible actions to be adopted and identify potential impacts on its equity and financial position. These condensed interim financial statements should be read in the light of said circumstances.

2- Revenues for the nine-month period ended September 30, 2026:

The decrease in inflation adjusted revenues amounting to AR$ 11,940.2 million between the nine-month periods ended September 30, 2026 and 2025 is due to:

- AR$ 13,942.1 million decrease in revenues from "Gas transportation services" destined to the domestic market, as a result of the rate restructuring mentioned in Note 1.2.3 to the Company's condensed interim financial statements as of September 30, 2026;

- AR$ 4,468.6 million increase in revenues from "Gas transportation services" for export, due to the increase in revenues invoiced in U.S. dollars and to the positive effect generated by the increase in the exchange rate of said currency; and

- AR$ 2,466.7 million decrease in revenues from "Gas pipeline operation and maintenance and other services".

As of September 30, 2026, 94.2% of the Company's revenues were derived from gas transportation services (regulated business), while the remaining 5.8% came from gas pipeline operation, maintenance, and other services (non-regulated business). In comparison, as of September 30, 2025, revenues from the regulated business constituted 93.9%, while those from the non-regulated business made up the remaining 6.1%.

3- 2024 Interim Agreement, 2025 and 2026 Five-Year Review:

On December 18, 2023, the National Executive Branch ("PEN") pronounced Necessity and Urgency Decree No. 55/23 which, among other things, (i) declared the commencement of the Five-Year Rate Review ("FYRR"), and (ii) decreed the intervention of Natural Gas Regulatory Entity ("ENARGAS").

On March 26, 2024, the Company entered into an interim agreement with ENARGAS for a rate adjustment, by virtue of which ENARGAS approved a 675% increase in TGN's transportation rates, effective as from April 2024 and monthly adjustable by a regulatory entity resolution. Such increase entailed the obligation to execute during 2024 a mandatory investment plan for the amount AR$ 19,150 million, adjustable in the same way as the rate, prioritizing reliability, safety and quality works along the gas pipeline system.

Through Resolution No. 255/25 published in the Official Gazette on April 29, 2025, ENARGAS established (i) to approve TGN's FYRR for 2025-2030 five-year period, effective as of May 1, 2025, which implies a 16.1% increase in the Company's revenue requirement, (ii) to approve the mandatory investment plans to be executed during said five-year period for a total amount of AR$ 416,996 million (in June 2024 currency), (iii) to implement the rate increase resulting from the FYRR in thirty-one monthly instalments, and (iv) to approve the initial transitional rate chart (instalment 1 of 31). In addition, through Energy Secretariat Resolution No. 241/25 dated June 3, 2025, section 9.4.1.1 of the Basic Rules of the Transportation License was amended, and through ENARGAS Resolution No. 351/25 dated June 5, 2025, it was established that rates will be adjusted monthly according to a variation based 50% on the Wholesale Domestic Price Index and 50% on the Consumer Price Index ("CPI"), published by the National Institute of Statistics and Census ("INDEC"). Subsequently, by means of ENARGAS Resolution No. 623/25, published in the Official Gazette on September 1, 2025, ENARGAS noted certain calculation errors in the FYRR process and proceeded to rectify TGN's revenue requirement for the five-year period 2025-2030, with the increase adjusted to 14.8%. Finally, it should be noted that, through Resolution No. 999/25 published in the Official Gazette on December 30, 2025, ENARGAS modified the revenue requirement and the transportation rate charts, as established in item 5.2 of the "Methodology for Rate Review" provided for in Article 3 of Necessity and Urgency Decree No. 55/23. As a result, the increase in the Company's revenue requirement resulting from the FYRR ultimately amounted to 15.52%.

On March 12, 2026, the Energy Secretariat issued Resolution No. 66/26, through which it provided: (i) to reconfigure the transportation system to adapt it to the new supply and demand structure and to the effective gas flows; (ii) to proceed, with regard to TGN's direct shippers, with the reversal of the northern gas pipeline toward the holding of an open tender that allows for the most appropriate contracting of capacities that have not been reassigned by the Energy Secretariat (distributors); (iii) to repeal the Transport.Ar plan created in 2022; (iv) to instruct the regulatory entity to implement the above, including approving provisional rate charts and the percentage of withheld gas for the new transportation routes, following a citizen participation

process and without affecting the revenue requirements of the licensees provided for in the FYRR; and (v) to instruct the Undersecretariat of Fuels to immediately promote the repeal of Necessity and Urgency Decree No. 689/02, that established rates in U.S. dollars for gas transportation destined to export.

Through Resolution No. 346/26 published in the Official Gazette on March 20, 2026, ENARGAS initiated a "Public Consultation" procedure in order to submit for consideration certain modifications and proposals related to the reconfiguration of the transportation system, including provisional rate charts. Subsequently, through Resolution No. 409/26 published in the Official Gazette on April 14, 2026, said regulatory entity concluded the public consultation stage and instructed natural gas transportation and distribution licensees to enter into new firm transportation agreements and/or adjust those already in force, in accordance with the guidelines and criteria established in the previously mentioned Resolution No. 66/26, and also postponed the issuance of the rate charts resulting from the reconfiguration of the transportation system to the time when the corresponding rate adjustments for May 2026 are carried out.

On April 30, 2026, ENARGAS issued Resolution No. 449/26 approving TGN's rate charts resulting from the reconfiguration of the transportation system. These rate charts imply a 6.2% drop in the Company's revenue flow (for the regulatory year between May 1, 2026 and April 30, 2027), as compared to the revenue flows determined in the FYRR. Notwithstanding the above, it should be noted that the total revenue requirements set out in the FYRR remain unchanged, considering the entire five-year period.

Finally, on July 8, 2026, PEN Necessity and Urgency Decree No. 580/26 was published in the Official Gazette, repealing Necessity and Urgency Decree No. 689/02, consequently, as of that date, regulated rates denominated in pesos began to apply to all gas transportation services provided by TGN, including gas transportation services for export.

4- Costs and expenses for the nine-month period ended September 30, 2026:

During the first nine-month period of 2026, cost of service totaled AR$ 226,143.9 million, representing a 6.8% year-over-year increase. The increase was primarily driven by higher expenses related to Maintenance and repair of property, plant and equipment as well as third-party services and supplies.

Administrative and selling expenses for the period amounted to AR$ 79,938.6 million, representing a 15.6% decrease compared to the previous year, mainly attributed to lower charges on Lawsuits and litigation expenses.

5- Financial situation:

As of September 30, 2026, the Company reported no outstanding financial debt, having fully repaid all borrowings in the prior period.

6- Operating data:

Volumes dispatched during the first nine-month period of 2026 decreased by 9.7% compared to the same period in 2025. This was mainly explained by a decrease in interruptible transportation services, partially offset by an increase in firm transportation services.

Below are volumes dispatched broken down by source, contract type and destination:

Per source in million m³	As of 09.30	
	2026	2025
Northern Pipeline	2,329	3,675
Central West Pipeline	10,460	11,693
Final Sections	5,175	4,529
Total	**17,964**	**19,897**

Per contract type in million m³	As of 09.30	
	2026	2025
Firm	9,793	9,079
Interruptible & exchange and displacement	8,171	10,818
Total	**17,964**	**19,897**

Per destination in million m³	As of 09.30	
	2026	2025
Domestic market	16,373	18,226
Export market	1,591	1,671
Total	**17,964**	**19,897**

7- Other relevant news of the period:

- On August 6, 2026, the Company's Board, in exercise of the powers vested by the Shareholders' Meeting held on April 15, 2026, resolved to partially distribute the "Reserve for working capital, future investments and/or payment of dividends" in the amount of AR$ 76,000,000,000. This payment was made on August 21, 2026.

ANEXXES:

1- Statement of Income (in millions AR$)

	Nine-month period ended	
	09.30.2026	09.30.2025
